

Gerald Miero

Frontend Developer

Frontend Developer with 7+ years of experience building enterprise applications in banking, fintech, and insurance industries. Skilled in Vue.js, React.js, Next.js, JavaScript, and TypeScript, as well in ASP.NET Core, with experience in feature ownership, code reviews, production support, and cross-functional collaboration.

WORK EXPERIENCE

Tata Consultancy Services

Frontend Developer

June 2025 – June 2026

Client Assignment – Insurance Company

- Developed customer-facing insurance applications supporting customer onboarding, financial needs analysis, product recommendation workflows, premium calculation, and business rule validation.
- Built and maintained administrative platforms supporting role-based access control (RBAC), notification management, content management, and operational configuration.
- Established project structure and frontend architecture for greenfield applications following organizational standards and best practices.
- Collaborated with business users, product teams, designers, QA engineers, and backend developers to deliver business-focused solutions.

PT Astra Welab Digital Arta (Maucash)

Frontend Developer

September 2022 – June 2025

- Developed and maintained customer-facing fintech applications supporting loan application and customer onboarding processes.
- Built administrative dashboards for marketing, risk management, and finance teams to support operational workflows.
- Developed solutions used by hundreds to thousands of users across internal and customer-facing platforms.
- Collaborated directly with business stakeholders and product teams to gather requirements and deliver technical solutions.
- Participated in code reviews and debugging activities to maintain application quality and consistency.
- Investigated and resolved production issues and application defects to support business operations.
- Assisted onboarding team members by introducing repository structure, Git branching strategy, SDLC processes, task documentation, and development workflows.
- Participated in sprint planning, estimation, backlog refinement, and Agile ceremonies.

Sprout Asia

Front End Developer

November 2021 – August 2022

- Developed reusable frontend components and shared UI libraries to improve development efficiency and consistency across projects.
- Built customer-facing subscription-based financial management applications supporting transaction tracking and billing management.
